

A1  
a holding member for holding the projection optical unit,  
and a light receiving member for receiving the unnecessary light,  
wherein the light receiving member is provided as a member independent of the  
holding member and is formed of a material different from the holding member.

---

A2  
15. (Amended) The projection type display apparatus according to claim 13, further  
comprising a light receiving member for receiving the unnecessary light, wherein said light  
receiving member is formed of a material different from the holding member.

---

**REMARKS**

The above amendments and following remarks are responsive to all the points of  
rejection raised by the Examiner in the non-final Office Action dated December 19, 2002.  
Upon entry of this Amendment, claims 1 and 15 will have been amended. Claims 1-25 are  
currently pending in the application. No new matter has been introduced by this paper. Entry  
and consideration of the Amendment are respectfully requested.

To assist the Examiner, attached to this Amendment is an "Attachment" that shows the  
amendments made to the claims 1 and 15 by bracketing the text that has been deleted and  
underlining the text that has been added.
